

ADOBE® CREATIVE SUITE® 4 DESIGN PREMIUM

Deliver innovative ideas in print, web, and mobile design

Adobe Creative Suite 4 Design Premium includes full new versions of:

- Adobe InDesign CS4
- Adobe Photoshop CS4 Extended
- Adobe Illustrator CS4
- Adobe Flash CS4 Professional
- Adobe Dreamweaver CS4
- Adobe Fireworks CS4
- Adobe Acrobat 9 Pro
- Adobe Bridge CS4
- Adobe Device Central CS4
- Adobe Version Cue® CS4

Transform the way you work with the ultimate toolkit for today's designer. Design with familiar tools, including Adobe InDesign®, Photoshop®, Illustrator®, and Acrobat®. Take advantage of timesaving new features to efficiently produce your work in print and bring the concept to life in digital media. Animating graphic elements with Adobe Flash® Professional is now easier than ever. And work with Adobe Fireworks® to translate a visual website mock-up to a prototype and then export standards-based CSS that you can use in Adobe Dreamweaver® to develop websites and applications.

Top new Creative Suite 4 Design Premium time-savers

Find and fix production errors twice as fast in InDesign*	Preflight while you design. Continuous preflighting alerts you to potential production problems in real time so that you can quickly navigate to a problem, fix it directly in layout, and keep working.
Adjust Photoshop images in half the time*	Use the new Adjustments panel and fluid on-image controls in Adobe Photoshop CS4 Extended to make changes in half the time needed when using Adjustment layers, menu commands, and dialog boxes in earlier versions of Photoshop.
Easily manage related works with multiple artboards	Keep up to 100 related artboards in a single Adobe Illustrator file to reduce organizational headaches and streamline project editing. Save, export, and print artboards independently or together.
Animate with fewer steps in Adobe Flash Professional	Quickly create animations, easily modify motion paths, and enjoy complete control over animation attributes. It's never been easier to get started with Flash.
Design and deploy web pages with far greater efficiency	Export standards-compliant CSS layouts in Adobe Fireworks CS4—complete with external style sheets—for a head start on web, mobile device, and HTML-based application work in Adobe Dreamweaver CS4.
Save time and cost in review cycles	Collect feedback from clients and colleagues more efficiently. Host online meetings via Adobe ConnectNow with the Share My Screen feature, or host PDF reviews to quickly consolidate feedback from multiple reviewers.

Top new Creative Suite 4 Design Premium creative features

Take your InDesign layouts into Flash Professional	Export documents to the XFL format and open them in Flash CS4 Professional with the visual fidelity of your original InDesign layout maintained. Use Flash to add sophisticated interactivity, animation, and navigation to complex layouts for an engaging online reading experience.
Create accurate composites with enhanced Auto-Align Layers	Move, rotate, or warp layers to align them more accurately than ever before using the Auto-Align Layers command. Or use spherical alignment to create breathtaking panoramas.
Nimbly manipulate 3D images with a new streamlined interface	Edit, enhance, and manipulate 3D images without dialog boxes. Adjust lighting, meshes, and materials. Easily orient objects and position the camera using 3D axes and a ground plane.
Create vector shapes naturally with the Blob tool in Illustrator	Sketch with a brush that generates a single clean vector shape, even when strokes overlap. Draw naturally, using the Blob Brush tool together with the Eraser and Smooth tools.

Visit www.adobe.com/go/designpremium for more reasons to buy or upgrade.

*Tests conducted independently for Adobe by Pfeiffer Consulting and performed on the latest generation Mac Pro using the latest updates to Mac OS X v10.5.5. Unless otherwise noted, data reflects Adobe Creative Suite 4 results as compared with earlier Creative Suite versions.
